

Thank you for purchasing your Laura Jayne Fisk diffuser

We have compiled some useful information to help you get the most of your new diffuser and enjoy it for as long as possible.

On opening your diffuser use the funnel included to help decant your bottle of oil into your bauble.

Included in your set are some porex reeds, they are a new product. They are especially engineered for diffuser's and are designed not to clog up like the traditional rattan reeds so the smell will last for longer. They are also designed so that they do not need to be flipped over, avoiding any unwanted oil drips.

Your reeds will begin to start soaking up the oil straight away and within 24 - 48hrs your reeds will start omitting a subtle and beautiful scent.

Always make sure you place your diffuser on a suitable surface such as a glass coaster to protect tables and surfaces, as the essential oils may leave marks.

Do not lights the reeds, as diffuser oils are flammable, be sure to keep them away from naked flames.

Be sure to keep them out of the reach of children and pets, and where they can not be knocked over easily. Essential oils can damage surfaces, fabrics and soft furnishings.

Do not ingest the diffuser liquid as essential oils can be harmful. Make sure you also retain the original bottle for your diffuser oil, as this contains the CLP safety warnings.

Your diffuser will last for 12 - 16 weeks, after which you be left with a beautiful fine bone china bauble which can be hung as desired.

Enjoy,
Laura
